

NEW CAMSO

Conquer 260

Agility in deep snow

Designed with a softer rubber compound for better deep-snow performance, the Camso Conquer 260's 2.6-inch lug design powers through the deepest mountain snow with ease. This lightweight track increases your machine's available horsepower, requiring less throttle input in turns and on side hills.

- 2.6" alternating single-angled lugs push performance in all snow riding conditions
- Lightweight model increases available HP thanks to less rotating mass
- Lug design requires 20% less rider input on turns and 25% less throttle to hold on side hills

CAMSO

Conquer 280

Above and beyond the deep stuff

Made to advance the mountain journey. The Conquer is the lightest mountain design track providing the ultimate in flotation, traction and performance. Its next generation lug geometry reaches new levels of balance in deep snow.

- Lightweight model increases available HP thanks to less rotating mass
- Lug design requires 20% less rider input on turns and 25% less throttle to hold on side hills
- 2.8" alternating single-angled lugs push performance in all-season riding conditions
