Ultimax UA

Ultimax® UA Belts by Timken

Each Ultimax UA belt is designed for its specific application. Specially formulated compounds create a durable and dependable belt that provides optimum performance.

Benefits

- Each belt is designed for a specific application
 - No “one size fits all” approach
 - Wide selection covers all major brands
 - Built to handle more load and abuse than the OE drive belt
 - Two year warranty
 - Made in the U.S.A.

Materials and Manufacturing

- Fiber-loaded rubber designed to grip the clutches and to stay that way over the life of the belt
- Each belt has rubber compounds that work best for the application
- Every Ultimax belt contains strong and stable aramid cord

Dimensions

- Every Ultimax belt is manufactured using new processes that reduce dimensional variation so every belt performs consistently
- Dimensions match OE in cord length and width, meaning your ATV, UTV or SxS will shift like new

Ultimax UA stands on the shoulders of giants in that its development starts with the best-selling line of snowmobile belts – belts that excel on 150+ hp sleds. From there, each belt is specially designed for its application. From materials to dimensions to cog design, Ultimax will take your ride beyond factory stock capabilities in performance and reliability.
