

## Plow Mount Installation Instructions

### Kawasaki Mule MA11732

#### Hardware List

- |     |                                     |     |                     |
|-----|-------------------------------------|-----|---------------------|
| (2) | 10mm x 30mm Hex Bolts (1.25 thread) | (4) | 3/8" x 1" Hex Bolts |
| (2) | 10mm Flat Washers                   | (4) | 3/8" Nylock Nuts    |
| (8) | 3/8" Flat Washers                   |     |                     |
| (2) | Quick Release Pins                  |     |                     |

#### Installation Instructions

Remove front plastic bumper guard. Attach plow mount to the front of your UTV per illustration. Remove front center skid plate bolts and retain the nuts to reuse. Slide plow mount onto front end with the back portion of the mount going between the front bracket and on top of the skid plate mount bracket. Use the 10 mmx30mm hex bolts and nuts retained on the back portion of the mount. Next line up the hole in the front and secure with 4-3/8" x 1" hex bolts, washers and nylock nuts. Tighten all bolts and replace the front plastic bumper guard. The push tubes will hook up to the tabs on the mount with the quick release pins.
