Slim Line Key Fob
Only 2" x 2.5" x 1/4"

Slim line Style iKEY Fob

Our Slim line fob turned a lot of heads in the keyless world when we introduced its sleek new design to automotive industry. Our innovative engineering resulted in the worlds thinnest active RFID transponder ever made. At only 2.5" x 2" x 1/4" in size, it will easily can slip into a wallet, pocket or purse without the bulky size or extra weight of a traditional vehicle remote. Its sleek and stylish appearance reflects the technical sophistication that

went into this advanced design. This Slim line iKey™ will perform complete "hands-free" operation of your doors and ignition without ever leaving your wallet. Three recessed buttons provide functions for extended range lock, unlock, trunk open, panic and optional remote start. A distinctive blue LED confirms your commands are sent and received by the iKEY system. You'll love the distinctive look and feel of this slim little high tech wonder.

OEM Style iKEY Fob In our never ending quest for perfection, our engineers set out to create a new OEM style key fob to rival that of the worlds top luxury automakers. With an exquisite new design that is both stylish and functional, the new iKEY OEM fob provides fully automated

operation of your vehicle's doors and ignition in a sleek, elegant new package. A quick glance is all that is needed to appreciate the fine craftsmanship that went into this advanced design. Its rugged high impact plastic housing is surrounded by a broad band of heavily plated chrome giving it an exquisite upscale appearance. The elegant chrome banding also features two eyelets for attaching your fob to an existing key ring if desired. The soft textured finish feels luxurious in your hand and makes gripping easy. The updated outer case is thicker, more substantial, and made to endure punishment. In addition to performing "hands-free" operation of your doors and ignition, the OEM fob features 3 buttons which provide extended range lock, unlock, trunk open, panic and optional remote start functions. A cool blue LED

confirms that your commands are sent and received by the iKEY system. This innovative design also incorporates a hidden compartment inside the fob to insert a "Hide a Key" blade for your door locks, assuring you'll never be locked out of your vehicle in the event of a dead car battery. You'll feel like a VIP when you upgrade your iKEY system with the beauty and feel of the awesome new OEM key fob!
