Your Detailing Prescription

Application Instructions

- 1.** Clean and dry surface.
- 2.** Shake well.
- 3.** Pour Plastic Sealant onto an applicator or fine brush and spread evenly over exterior plastic surfaces.
- 4.** Let sit for a moment, then wipe off any excess with a clean, dry microfiber towel.

Additional Tips

For maximum results, use Plastic Conditioner, followed by Exterior pH Neutralizer before applying Plastic Sealant. Before applying, test a small amount in an inconspicuous place to check compatibility with surface.
