Note; All X-33 axles are 38" long. The wheel mounting surface with the hubs in the widest position is 38" wide (this would be where the wheels bolt onto the wheel flange).

Note; The notation for oversize/undersize is listed at the right. For example, the 20-1127ex shows +1+6. This means the X-33 can be stock + 1" to stock +6" depending on the wheel hub mounting location.

0+5 means the X-33 can be stock width to stock +5".

-3+2 means the X-33 can be stock -3" (shorter) to stock +2".
