

**Belt Weatherstrips** which are also known as beltline moldings, beltline weatherstrips, window fuzzies, cat whisker, dew wipes, and window felts. There are two beltline weatherstrips on each door. Inner belts are the weatherstrips along the interior beltline of a door that prevent water, air and dust from entering the vehicle. Outer belts are the weatherstrips along the exterior beltline of a door that prevent water, air and dust from entering the vehicle. The outer belt is also an exterior ornamental component that can have chrome, stainless steel beads or color to give the vehicle a nice look.

Fairchild Industries excels in providing rubber and plastic focused solutions and engineering services to a variety of customers in the various Markets.
