

## Axis Truing-Balance Stand

The NEW Axis Truing Balance Stand will surpass all your expectations for quality and function. It's signature blue powder coated steel tubular frame is designed to fold away for easy storage. The innovative single sided design makes it easy to access spokes nipples. The 15mm axle fits most modern street and off- road motorcycle wheels and features high quality bearings that allow precise wheel balancing. An aluminum hub cone with setscrew keeps wheels firmly locked in place. For truing, an aluminum pointer is mounted to a clamp with horizontal and vertical adjustment to accommodate most motorcycle wheels. Innovation and functionality are the hallmarks of any product we design and the Axis Truing-Balancing Stand is no exception. We design tools for the professional mechanics and DIY that give professional results in any setting.

Accept no compromises, choose only quality motorcycle tools.
