Outlaw Racing KTM65 Oversized Brake Pads

Tired of the typical KTM65 brake pads bending and wearing out too quickly? The Outlaw Racing Brake Pads are oversized and will out last and perform standard brake pads. The typical KTM65 brake pads tend to bend inward when they wear out, Outlaw oversized pads are made for an even wear and solid structure to prevent this from occurring. The metallic sintered pads offer more controlled braking; these pads are a must for a KTM65.

NOTE: These brake pads do not utilize the stock spring clip. When removing and installing rear wheel, make sure brake pads are still mounted correctly in caliper when replacing wheel.

Outlaw Racing Super Seal Air Filters

Supersal neoprene gasket base seals perfectly even in the most extreme conditions without the hassle of messy grease. Extra wide sealing ring for air tight seal. Bonded dual layer foam, the coarse outside layer catches large particles and resists clogging while the fine inner layer filters the finest dust. Outlaw filters are larger than stock for greater airflow and more engine protection.

ONE YEAR WARRANTY: The Outlaw Super Seal Filters come with a one year warranty on workmanship and materials. Any air filter that is determined by Outlaw Racing to be defective within one year of purchase will be replaced. Simply return the filter to Outlaw Racing along with the retail invoice. Replacement of air filter shall be the sole remedy to any defective air filter.

NOTE: The use of gas or No-Toil products as a cleaner may cause the Neoprene seal to come loose from the filter. Use of these 2 products voids warranty

Outlaw Racing Crank Bearings and Seal Kits

Contains right and left crankshaft bearings (contains outer seals for all 2-stroke engines). Feature Koyo and Nachi Bearings (precision Japanese crank bearings). Reduce crank pin wear with our crank seals. Designed with a carbon/fluorocarbon sealing lip to reduce dry start friction.

Outlaw Racing Fork Seals & Dust Seal Kit

Hands down, the most complete line of wheel bearing & seal kits. All the bearings and seal required to re-fit a wheel in one convenient package. Premium high-speed bearings feature low drag and double lip seals on both sides to provide superior exclusion of water and dirt, along with improved grease retention. High performance chevron SRI-II grease features special rust inhibitors for the most demanding applications. Type TC, nitrile elastomer wheel seals are specifically designed to keep out water and dirt. The rubber coated outside diameter creates an optimum seal at the hub.

Outlaw Racing Shock Seal Head

All seal heads are made from 6061-T6 Aluminum to save weight. All Rear Shock Seal/Head Kits have an air bleed hole. This helps remove air from the oil reservoir during seal head installation. Oil seal utilizes a double lip design and a low friction elastomer. This gives the seal head additional dirt exclusion and yet maintains a low drag (low friction) seal. These are complete assemblies, ready to install into the shock body. No longer is it necessary to replace bushings, seals, O-rings etc. All Rear Shock Seal/Head Kits include Aluminum body, dust seal, Bushing, oil seal, O-ring, internal guide bushing/ washer, snap ring and top out bumper.

Outlaw Racing Wheel Bearing & Seal Kit

Hands down, the most complete line of wheel bearing & seal kits. All the bearings and seal required to re-fit a wheel in one convenient package.

Premium high-speed bearings feature low drag, double lip seals on both sides to provide superior exclusion of water and dirt and improved grease retention. High performance chevron SRI-II grease features special rust inhibitors for the most demanding applications. Type TC, nitrile elastomer wheel seals are specifically designed to keep out water and dirt. The rubber coated outside diameter creates an optimum seal at the hub.

Outlaw Racing ATV Super Seal Air Filters

Superseal neoprene gasket base seals perfectly even in the most extreme conditions without the hassle of messy grease. Extra wide sealing ring for air tight seal. Bonded dual layer foam, the coarse outside layer catches large particles and resists clogging while the fine inner layer filters the finest dust. Outlaw filters are larger than stock for greater airflow and more engine protection.

ONE YEAR WARRANTY: The Outlaw Super Seal Filters come with a one year warranty on workmanship and materials. Any air filter that is determined by Outlaw Racing to be defective within one year of purchase will be replaced. Simply return the filter to Outlaw Racing along with the retail invoice. Replacement of air filter shall be the sole remedy to any defective air filter.

NOTE: The use of gas or No-Toil products as a cleaner may cause the Neoprene seal to come loose from the filter. Use of these 2 products voids warranty.

Outlaw Racing Ez Pull 3 Position Clutch Lever & Perch

3 positions lever lets you choose from 3 positions according to your clutch pull preference. Top position gives you increased cable pull, middle position is the same as a standard lever, bottom position provides an easy pull (30% less effort). Cable adjuster has swivel action for the different cable angles, universal fit for all bikes. Made from forged aluminum.

Outlaw Racing Brake Cables

Black PVC outer sheathing provides maximum flexibility and durability. Pre-stretched inner wire is flared out before the terminal end is cast for superior pull out resistance. Molded rubber components feature EPDM rubber for high UV resistance and longer life. EPDM rubber boots are designed with a tighter fit than OEM for superior water and dirt resistance. Meets or exceeds OEM standards. Includes adjuster hardware spring, nut, and barrel where applicable.

Machined smooth heads helps reflect combustion heat and reduces carbon buildup, protecting the top of the piston resulting in increase horsepower and fuel economy by up to 6%. Outlaw Racing ATV Ball Joints

• Ball joint kit is sold per A-Arm and comes with snap ring and cotter pin. Ball Joints feature HD steel cases with POM-M90 bearing material for long life. AB offers replacement ball joints for those Kawasaki and Suzuki applications that force you to buy an expensive A-Arm or steering knuckle. Put an end to premature Honda ball joint failure by upgrading from the OE aluminum joint to our HD steel joint.

STEEL HOUSING

Honda's aluminum joints have been upgraded to steel.

POM-M90

Bearing cup material to isolate steel rod from housing.

- The Outlaw Racing CV Boot material is compounded from an OEM grade DCR66 rubber that is formulated specifically for the demanding requirements of today's ATV's and UTV's. Easier to install than most OEM and aftermarket boots. 40% higher tensile strength than conventional CV boot material, suitable for the high joint angles of today's ATV's and UTV's. 50% more abrasion resistant than conventional CV boot material to assure long life in today's harsh off-road environments. Rubber compound is tested to -40° F to assure good performance and long life at low temperatures. Kits include two stainless steel clamps that are designed to be tightened without the use of special tools, Lithium based Molybdenum Grease insures good lubrication for long CV joint life.

Outlaw Racing Fork Seals & Dust Seal Kit

Hands down, the most complete line of wheel bearing & seal kits. All the bearings and seal required to re-fit a wheel in one convenient package. Premium high-speed bearings feature low drag and double lip seals on both sides to provide superior exclusion of water and dirt, along with improved grease retention. High performance chevron SRI-II grease features special rust inhibitors for the most demanding applications. Type TC, nitrile elastomer wheel seals are specifically designed to keep out water and dirt. The rubber coated outside diameter creates an optimum seal at the hub.

Outlaw Racing Starter Rebuild Kit

Don't replace it, rebuild it. 9 times out of 10 when your starter goes out, it is really just the brushes no longer making contact with the armature. This kit contains the wearable springs and brushes that come into contact with the rotating armature re-energizing it.

Outlaw Racing Honda Air Cut Off Rebuild Kit

Outlaw Racing's Air Cut Off rebuild kits are an inexpensive way to repair a potentially costly problem. Air cut off valves keep your bike from running lean and damaging your engine. OEM components are expensive and hard to find, but Outlaw Air Cut Off rebuild kits are guaranteed to fit, and include a new diaphragm, spring and o-ring.
