Product Guide

SUPERWINCH[®]

No one likes waiting on a slow winch. The Superwinch Talon is one of the fastest on the market today at 62 feet per minute.

Behind all that speed is a premium winch engineered for top performance when using steel wire cable or synthetic rope. A 100% load-holding disc brake combined with planetary gears provide steady operation and optimal performance.

Available in capacities from 9,500-18,000lbs.

Sealed to IP67

External disc brake prevents damaging heat to synthetic rope

Exclusive ergo remote features LED light and quick stow coil

Reinforced drum resists rope's torque

Ready to take a bite out of any application. The Superwinch Tiger Shark brings more to the task - from high powered motors to stainless steel fittings and hardware.

Available in steel wire or Dyneema™ synthetic rope in 9,500 or 11,500 lbs capacity or steel wire in capacities up to a whopping 17,500 lbs.

S SERIES

Most powerful trailer winch ever. New! Redesigned from the ground up, the new S continues Superwinch's dominance as the only trailer winch manufacturer. Available in wire or synthetic rope

Available in 7,500, 5,500 and 3,500 lbs capacities.

Innovative kick-flip controls freespool with ease

Sealed S3 Solenoid

Steel cut gears for better engagement and long life

Strong roller-coaster fairlead/hawse hybrid keeps spooling easy

TERRA

World's best powersports winch. It's not a claim we make lightly and we back it up with stronger motors, beefed up drums, strong steel or synthetic rope and an industry-leading lifetime warranty. Bottom line: lower amp draw and faster line speeds keep Terra at the top of everyone's list. 2,500, 3,500 and 4,500 capacity.

Field-tested and proven. You need a winch, not pricey bells and whistles - and that's just what the powerful LT2000, 3000 and 4000 LT Series winches deliver. From durable planetary gears to a reliable brake, the LT Series is at home pulling you out of the mud or plowing in the snow.

LT ATV

Have it all. A winch for folks on the move. Goes from car to snowmachine to ATV to wherever you can dream up next. Comes with all the gear you need - pulley, straps, shackles and even a pair of gloves. 4,000 lbs capacity and choice of wire or synthetic rope.

Up to 8,000lbs total pulling capacity

Ready to double-line with included shackles and pulley block

Available with synthetic or steel wire cable

Stuffed with all you need for a days winching

UTILITY

UT3000 - small size, big utility. With pull and turn freespool, the UT3000 is Superwinch's little powerhouse. Heavy duty controller and roller fairlead on a mount plate make this a great choice for big jobs.

Solid little winch. The LT2000 is not big on size but pulls 2,000lbs with ease. Industrial-style remote controls power in and power out. Steel cable and pull and turn freespool.

Built to last. Our X Series winches feature a capacity range of 2-4000lbs. Aluminum housing and steel gears compliment the simple design that stood the test of time.

ROAM

Superwinch

Winching? We've got an app for that. Unleash the power of your winch with our new Superwinch ROAM smartphone command system. Using Wi-Fi, we connect sensors on your winch to your smartphone for critical winch data monitoring.

Racers trust Superwinch. Weak AM band wireless remotes are not part of safe winching. Years of research went into Certus Wireless to meet our standards and your expectations. Plug and play design makes installation quick and easy.

CERTUS

Powersport Winch Mount Kits Custom built for each make and model, Superwinch Powersport Winch Mounting kits adapt a Superwinch to your rig. 1/4" powder-coated steel give you a solid winch mounting point.

Metal hubs. Reliability meets durability in Superwinch's locking hubs. Secure engagement and ease of selection make Superwinch hubs a favorite with off roaders.

Can't reach it? Superwinch Synthetic Rope Extension is the secret winching pro's rely on to extend their winch line for added range when you need it. Available in lengths of 25', 50', 75' and 100' in diameters of 1/4", 3/8" and 1/2".

Kinetic Recovery. Designed for quick extraction for the military, the Superwinch Kangaroo Kinetic Recovery Rope acts like a rubber band transferring energy to a stuck vehicle. Available in 20' and 30' versions.

Winching is more fun with the right gear.
